

# WHAT DO OUR PARENTS SAY ABOUT US?

What do our **parents** say about us?

*He was always a quiet child but thanks to all the staff he has blossomed into a wonderful young man who can't get enough of school life*

# What do our **parents** say about us?

*Absolutely fantastic primary experience. He has been cared for, educated, nurtured in a safe environment .... and experienced a variety of skills he will be able to readily use throughout his life..... resilience being one of the key ones! He leaves his primary school with a positive attitude and has many fond memories of his early schooling years. I can't thank you all enough.*

# What do our **parents** say about us?

*I'm so privileged that my daughter got into the most loveliest school not only teachers but other children also. I've seen her grow up to a lovely lady. A great foundation set out for lifelong friendship and learning. Well done Hordle.*

*A school that absolutely has the children at the heart of everything it does. A nurturing environment when all three of our children have grown academically and emotionally and have been fully prepared for the next chapter in life.*

# What do our **parents** say about us?

*My child has blossomed at Hordle. He came to the school very troubled, unheard and insecure in October of his final year of primary. In just a few months he changed. Supported, heard, directed not forced, praised, and valued.... his time here has mended him, ready to embrace secondary school. He would not have coped otherwise. His teacher - has been wonderful as has his TA. The headteacher has also been instrumental in helping him to find better choices for actions. It's a wonderful school, full of amazing people and brilliant culture.*

# What do our **parents** say about us?

*My child has flourished while at Hordle School. The level of care and attention she has received have been impeccable. She will always remember with gratitude her seven year journey in Hordle school. It has definitely set her up for a successful transition, not only to secondary school, but to adult life. In the marketing spiel given when parents are exploring possible schools, you make it clear that the children's happiness is your primary aim. This is not just a sales pitch. This is encapsulated in the John 10:10 vision and is absolute reality evidenced in the smiles and joys on the kids' faces every day.*

# What do our **parents** say about us?

*The amazing teachers and the incredible organisation of the school. Also the wonderful Mrs Adams for running the most incredible primary school. My son's education has been top class.*

A stylized white tree branch with several leaves in various colors: red, blue, yellow, green, and white. The background is a solid blue color.
