Types of farms

Arable farms - grow crops in their fields

Dairy Farms - use milk from animals to make cheese, yoghurt and butter.

Livestock farms - raise animals for meat, wool or eggs

Facts/Understanding the World

There are about 280,000 farms in Britain. Many farmers are busy all year round preparing the ground and growing crops, as well as looking after animals and breeding baby animals. Dairy farms milk their cows all year round. Many farmers get up before 5am to start their day and at busy times may work up to 12hrs a day. Cattle in the UK have passports that keep a record of their birth and where they get moved to
